

SOLID GOLD

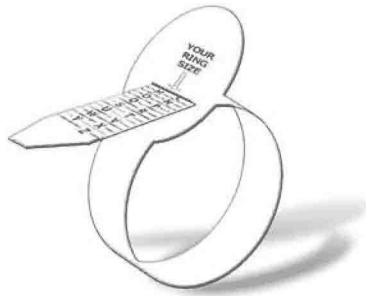

The perfect setting for diamonds

To establish your ring size:

- 1) Print this PDF at 100% - make sure that 'Page Scaling' is set to 'None' in the 'Print handling' section of the print screen.
- 2) Measure the line below. If it measures 5cm, you have printed the page out correctly.

- 3) Cut out the ring sizer on the right and make a slot as indicated.
- 4) Place the end of the ring sizer through the slot to make a loop as shown in the example below.

- 5) Make sure the ring sizer fits comfortably and can be moved over your knuckle.
- 6) The letter on the line shown through the slot indicates your ring size.
- 7) Keep in mind, Solid Gold also offers half sizes for our rings if required.
